- JavaScript
- CSS
- HTML
- JQuery
- Proficient with Bootstrap Framework
- Node.js
- Express.js
- MySQL
- Handlebars

PROJECTS

- Technology Online Forum - A site created for beginner to expert web developers to promote the free sharing of ideas and advice related to technology. Gives users the chance to ask questions to their fellow tech community or share interesting articles and ideas. Each user has their own dashboard where they can add, edit or delete their posts. Also have the ability to comment to other users posts. Made with HTML, JavaScript, Bootstrap Framework, MySQL, Express.js, Node.js and Handlebars. <https://github.com/madsterest/tech-forum>

- Procrastination Tracker - A site to help you keep on track of your projects. Allows the user to create a new project with its title, description and due date and save it to their dashboard. You can then add smaller tasks that can be ticked as you complete them to help you achieve your overall goal. Made with HTML, JavaScript, Bootstrap Framework, MySQL, Express.js, Node.js and Handlebars. <https://github.com/madsterest/procrastination-tracker>
- Stranded Covid Tracker- A site that shows current data regarding the Covid 19 pandemic in countries around the world. Tracks your current location to display statistics on Current Cases, Deaths, Vaccines and a status for whether it is safe to travel. Made with Bootstrap Framework, JavaScript, HTML and 2 API's, Geolocation and Covid Statistics. Also uses Local Storage to save searched countries. <https://github.com/madsterest/covid-tracking-application>
- Interactive Weather Forecast Application- Allows the user to look up cities around the world and displays its current weather and a 5 day forecast. Uses a Bootstrap framework, HTML, JavaScript and a weather API called Open Weather. <https://github.com/madsterest/weather-forecast>
